

TACTICAL PROTECTOR VEHICLE™

HIGH MOBILITY PROTECTED TACTICAL VEHICLE
DESIGNED FOR LAW ENFORCEMENT
AND HOMELAND SECURITY

GET IN. GET AROUND. GAIN CONTROL.

VERSATILITY

PERFORMANCE

PROTECTION

Tactical Protector Vehicle™ from Oshkosh Defense adds a strategic dimension to Special Operation missions. With a new standard in mobility, military-grade protection and capacity for up to eight officers, it enhances access, speed and safety in urban, rural and off-road high-risk situations.

- Small team high-risk missions
- High-risk warrants
- Active shooters
- Armed suspects
- Officer/citizen rescue
- First response for high-risk situations
- Up-close hostage scenarios
- Vehicle take-down
- Barricaded suspects
- Protected communications
- Specialty missions (i.e. stadiums, parking garages)

OPERATIONAL AND TACTICAL FEATURES INCLUDE:

- 116 inch wheelbase
- <42 foot curb-to-curb turning circle
- <43 foot wall-to-wall turning circle
- Up to 18 inch vertical step capability
- 13 inch ground clearance
- 75 mph maximum speed
- Capable of grades up to 60%
- High approach angle (38°)
- High departure angle (30°)
- High static side slope (37°)

PROVEN SURVIVABILITY BY OSHKOSH DEFENSE

As criminal organizations are increasingly armed with military-style weapons, law enforcement operations require the same level of field-tested and combat proven protection used by soldiers and Marines in Iraq, Afghanistan and other high-risk locations.

INTEGRATED SURVIVABILITY SYSTEM

Protecting officers from complex and ever increasing threats is not as easy as bolting together steel plates or even modifying conventional vehicles. Oshkosh Defense has given Tactical Protector Vehicle™ the same Integrated Survivability System (ISS) used to protect lives in military zones.

ISS features include protection ratings from NIJ Level I to Level IV, the capability of stopping a 7.62 ball through 14.5mm AP rounds, and under-body armor with available suspended seat systems where a potential IED threat exists.

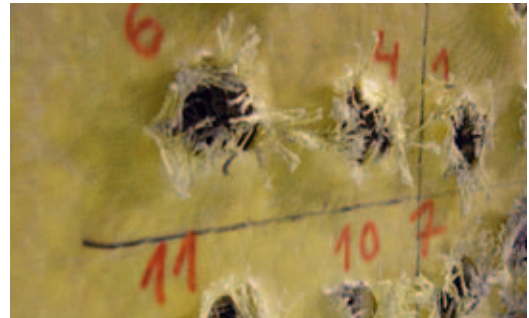

CONFIGURED TO PROTECT OFFICERS AND COMMUNITIES

Tactical Protector Vehicle™ is built and protected to the military standards required during high-risk callouts including terrorist threats, hostage situations, drug interdictions, and gang activities. But since different forces face varying threat profiles, the vehicle can be configured to best serve the needs of a community's high risk mission portfolio.

Two body styles are available – Utility and Transport – along with varying arrangements of seating and storage elements. Bucket or bench seating will accommodate two to eight officers, standard or custom storage can be added, and communications gear can be mounted and wired.

To enable rapid deployment, exterior features include a rear step with grab handles, side running boards and hand rails. It also includes exterior lighting, FLIR, ladders, second-story entrance ramps, and winches. Many other options can be added to meet specific requirements.

Composite armor panels mean exceptional multi-hit performance.

OSHKOSH DEFENSE KNOWS ARMAMENT, ARMOR SYSTEMS, ARMOR STANDARDS, AND HOW TO APPLY ARMOR SYSTEMS FOR MAXIMUM PASSENGER PROTECTION.

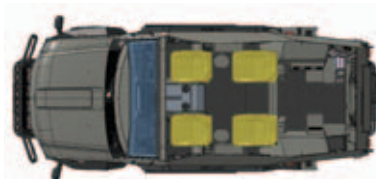

Tactical Protector Vehicle™ interior as configured with suspended seating for four and fold-away rear bench seats.

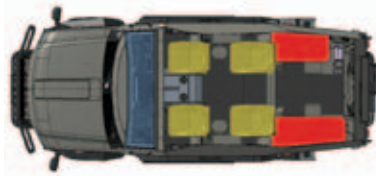

Seating

Tactical Protector Vehicle™ interior options allow flexible seating for up to eight officers, equipment storage, electronics and communications gear – all selected to suit your missions.

Bucket seating for four officers

Bucket and rear bench seating for eight officers

Bucket and rear bench seating for eight officers with rear buckets reversed

**A NEW STANDARD IN
HIGH MOBILITY
AND MANEUVERABILITY**

Tactical Protector Vehicle™ brings a high level of protected mobility and maneuverability to tight and difficult places such as narrow alleys, debris covered streets, driveways and twisting trails.

It is built to confront the toughest, most demanding and most dangerous situations your law enforcement officers may face, enabling them to get in, get around and gain control.

RUGGED, RELIABLE, READY TO PERFORM

Tactical Protector Vehicle™ is built on the rugged Ford F550 chassis complete with a 325HP turbocharged V-8 engine. For the sake of vehicle compactness and mobility, the chassis is shortened to achieve a 116 inch wheelbase. Upgraded axles and suspension components increase vehicle payload.

COMPREHENSIVE AFTER-SALE SUPPORT

Tactical Protector Vehicle™ is backed by a combination Ford/Oshkosh warranty and supported bumper-to-bumper by Oshkosh Corporation's world-class service capabilities. This includes a nationwide network of service professionals and certified maintenance facilities, each with an outstanding reputation and a long history of municipal vehicle service.

Tactical Protector Vehicle™ will perform at an extreme level on every assignment, every time – not only because it carries the Oshkosh name and reputation, but because it's backed by Oshkosh service professionals.
